Treat yourself to feeling relaxed and rejuvenated as you start your New Year

Hypnotherapy

Hypnotherapy induces a trance-like state during which the person is so deeply relaxed that the unconscious becomes accessible to suggestion.

Our unconscious mind is very powerful but is open to suggestion when our conscious mind is relaxed.

Hypnotherapy is effective with anxiety management, fears, phobias, habits, weight management and self confidence. This session is an introductory session to introduce you to the benefits of Hypnotherapy. You will then be entitled to 10% discount off any further sessions, if required.

This voucher is valid until
31/03/2022
